

# Environmental policy

We are a leading manufacturer of lubricants, additives and engine oils, vehicle care products and chemical repair aids, as well as service-, adhesive- and sealing products. Our activities include development, manufacturing, sales and logistics. We are taking decisive actions regarding environmental protection to achieve a leading position also in this respect. This applies to our environmental performance as well as the environmental impact of our products. Our aim is to produce as environmentally-friendly and resource-efficient as possible. We are thus following the goal of a sustainable development to ensure that future generations will have a clean environment worth living in!

## Furthermore, the following guiding principles apply for the location in Ulm-Lehr:

- We are committed to climate protection. Our goal is to minimize and, if possible, avoid emissions which are damaging to the climate.
- We promote responsible and comprehensive environmental protection and are continuously improving our environmental performance. We research and develop environmentally-friendly products and processes to avoid potential environmental pollution.
- During operations at the location, we strive to implement a continuous improvement process in environmental matters. The environmental performance is displayed in key performance indicators. This paves the way for discussions with potential customers.
- All resources required for operation are used sparingly according to existing possibilities to keep the environmental impact as low as possible.
- The foremost objective of our environmental policy is to maintain human dignity, health and well-being. For this, natural resources are to be protected from damaging effects by humans or already existing damages are to be removed subsequently.
- Our commitment is to the highest quality and safety of our products, services and actions. In doing so, we consider the interests of co-entrepreneurs, customers, suppliers and other business partners, as well as neighbours and society.
- We use our process-oriented, integrated management system according to the international standards ISO 9001, ISO 14001 and ISO 50001 for quality-, environment- and energy management, to achieve our goals efficiently, to continuously improve our performance and to keep on developing our company successfully and sustainably.
